Default Catalog Year: By completing this form, OTC will update your selected program to the current

ALLIED HEALTH PROGRAMS

FOR STUDENTS INTERESTED IN A SELECTIVE ALLIED HEALTH PROGRAM

Please help us determine which selective Allied Health program you are interested in applying to so that we can help you track your progress in MyOTC with a prospective program degree audit. **You will remain in the AS.BCS (Associate of Science in Biological Clinical Science) as an active degree seeking student until admitted for financial aid purposes.** You will also have access to an additional audit that will allow you to view pre-admission information for your prospective program.

Please keep in mind that the following programs require a separate admissions process; you cannot be degree-seeking in any of these programs until formally accepted by the Department.

PLEASE NOTE: This is NOT a program application; to review the admissions steps for any of these programs, please visit the [Allied Health website](#).

Please check the program(s) you are interested in pursuing (*maximum of 5 programs*):
